## OptoSigma Extended Contact Goniometers

- New manufacturing process allows extended contact bearing ways to be machined into the body of the stage, making the goniometer simpler, smaller and stronger.
- Centering accuracy is 10x better than typical dovetail goniometers.
- Available with micrometer drive, manual worm gear drive and motorized worm gear drive.
- New locking mechanism offers superior stability.
- Many sizes and rotation heights available.
- Available in black chrome finish and bare stainless finish.
- Centering pin for aligning two axis stacks.

## Ultra-thin Extended Contact Steel Stages

Thin is in! Total stage height is only 1cm.

- 45% thinner and 30% lighter than our standard extended contact steel stages.
- Up to 60% thinner than equivalent Aluminum stages.
- As the bearings are the limiting factor on performance, these stages have the same performance specifications as our taller extended contact stages.
- New opposed screw locking mechanism.
- Available with micrometer actuators or fine pitch screw actuators.
