

Laserlightbarrier LS02 in a M18 sensor-housing with M12 sensor connector

Th
sel

- Short response time
- Choice of response to light and dark signal
- Suppression of interfering light
- Long range
- M18 sensor housing / M12 sensor connector
- Solid construction
- Watertight (IP67)
- Accepts wide range of operating voltage

Through short response time, the lightbarrier is used for time measurement, controlling of a bullet`s velocity acceleration etc.
